

Dear Tim,

would you kindly check if they were OK or not, thanks.

- 1) We have corrected the 731 in the attachment;
- 2) We have remove the band of 5150-5250 MHz, and update the test report, manual, RF exposure, Operational Description and 731 form in the attachment;
- 3) The ZA-5000-E can only run as 802.11a, because manufacturer have been designed for 802.11a using the Internal Software, you can refer to the user manual of Page 15 for "wireless Mode: 11a only";
- 4) We have been corrected the User Manual in the attachment;
- 5) We have been corrected the Operational Description in the attachment;
- 6) The User Manual of Page 54 have been modified the Output Power;
- 7) We have tested the three channel and update the report in the attachment;
- 8) We retest the the conducted Band Edge and update the test report in the attachment;
- 9) We corrected by User Manual of Page 9;
- 10) The User Manual of Page 9 have been modified;
- 11) We have been corrected the manual;

Thanks in advance .

best regards,
Jewel
